Summary

Software Engineer specializing in GenAI and full-stack application development, with production experience building web platforms and AI-powered workflows. Hands-on with LLM applications, API integration, Python, React, Next.js, Node.js, and SQL/NoSQL databases.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

AI/GenAI: NLP, LLM Applications, LangChain, Prompt Engineering, MCP

Frontend: React.js, Next.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, Postman

CS fundamentals: DSA, OOP, DBMS, OS, Computer Networks

Experience

Associate Software Engineer

January 2026 – September 2026

PESU VENTURE LAB

Bangalore, Karnataka

Promoted from Software Development Intern to Associate Software Engineer (July 2026)

- Engineered and shipped a full-stack influencer-brand platform using Next.js, React, Node.js, Express, and MongoDB, serving **1,000+ live users**.
- Designed **REST APIs** and automation workflows for campaign creation, promotions, checkout, and onboarding, integrating Moodle LMS SSO and auto-login to streamline user access.
- Built LLM-powered recommendation and offer-ranking agent using **Groq and MCP**, implementing fallback handling to maintain reliable application behavior across AI-driven features.
- Collaborated with a 6-member development team on **pre-production testing and issue resolution**, validating features before live releases and troubleshooting production issues to maintain platform stability.

Projects

AI Powered Career Preparation Platform

GitHub

React, TypeScript, Node.js/Express, tRPC, MySQL/Drizzle ORM

- Built a full-stack AI career platform unifying **4 workflows**—resume analysis, job matching, resume improvement, and role-specific interview simulation.
- Built a **resume processing pipeline** with PDF/DOCX text extraction and database storage, allowing the same resume to be used across multiple AI workflows.
- Engineered **LLM-powered workflows** for resume parsing, content enhancement, job-skill matching, and role-specific mock interview.
- Implemented **production-ready foundations** including JWT authentication, secure password hashing, S3 file storage, usage/rate limiting, API security controls, subscriptions, and cloud deployment.

Concurrency-Safe Inventory Reservation System

GitHub

Next.js, TypeScript, PostgreSQL

- Engineered a **concurrency-safe reservation engine** using PostgreSQL transactions and atomic updates, preventing overselling during simultaneous checkout requests.
- Implemented a **Pending → Confirmed → Released state machine** with a 10-minute TTL and lazy cleanup on read, eliminating reliance on cron-based expiry jobs.

Agent Management & Task Distribution System

GitHub

React.js, Node.js, Express.js, MongoDB

- Built and deployed a **role-based task management platform** for admins to assign, track, and monitor agent workloads through centralized dashboards.
- Implemented **JWT-based authentication and authorization** with MongoDB-backed task workflows and dynamic status tracking.

Education

PES UNIVERSITY

Bachelor of Technology in Computer Science & Engineering

Bangalore, Karnataka

September 2022 – May 2026
